

JOINT WASTE DISPOSAL BOARD

NOTICE OF MEETING

THURSDAY 24 JANUARY 2019

TO: ALL MEMBERS OF THE JOINT WASTE DISPOSAL BOARD

You are invited to attend a meeting of the Joint Waste Disposal Board on **Thursday 24 January 2019 at 9.30 am** in the LGF4 - 20 EXT: 6415, Civic Offices, Shute End, Wokingham RG40 1BN. An agenda for the meeting is set out overleaf.

Oliver Burt
re3 Strategic Waste Manager and
Project Director

Members of the Joint Waste Disposal Board

Councillor Mrs Dorothy Hayes MBE, Bracknell Forest Council
Councillor Iain McCracken, Bracknell Forest Council
Councillor Sophia James, Reading Borough Council
Councillor Tony Page, Reading Borough Council
Councillor John Halsall, Wokingham Borough Council
Councillor Simon Weeks, Wokingham Borough Council

EMERGENCY EVACUATION INSTRUCTIONS

If you hear the alarm:

- 1 Leave the building immediately**
- 2 Follow the green signs**
- 3 Use the stairs not the lifts**
- 4 Do not re-enter the building until told to do so**

If you require further information, please contact: Hannah Stevenson
Telephone 01344 352308
E-mail: hannah.stevenson@bracknell-forest.gov.uk

JOINT WASTE DISPOSAL BOARD
Thursday 24 January 2019 (9.30 am)
LGF4 - 20 EXT: 6415, Civic Offices, Shute End, Wokingham RG40 1BN.

AGENDA

Page No

1. NOMINATION OF VICE CHAIRMAN

2. APOLOGIES FOR ABSENCE

3. DECLARATIONS OF INTEREST

Members are asked to declare any disclosable pecuniary or affected interests in respect of any matter to be considered at this meeting.

Any Member with a Disclosable Pecuniary Interest in a matter should withdraw from the meeting when the matter is under consideration and should notify the Democratic Services Officer in attendance that they are withdrawing as they have such an interest. If the Disclosable Pecuniary Interest is not entered on the register of Members interests the Monitoring Officer must be notified of the interest within 28 days.

Any Member with an affected Interest in a matter must disclose the interest to the meeting. There is no requirement to withdraw from the meeting when the interest is only an affected interest, but the Monitoring Officer should be notified of the interest, if not previously notified of it, within 28 days of the meeting.

4. MINUTES OF THE MEETING OF THE JOINT WASTE DISPOSAL BOARD

5 - 12

To approve as a correct record the minutes of the Joint Waste Disposal Board held on 12 October 2018.

5. URGENT ITEMS OF BUSINESS

To notify the Board of any items authorised by the Chairman on the grounds of urgency.

6. PROGRESS REPORT

13 - 20

To brief the re3 Joint Waste Disposal Board on progress in the delivery of the re3 Joint Waste PFI Contract.

7. PRESENTATION ON WOKINGHAM BOROUGH COUNCIL FOOD WASTE ROLL-OUT.

8. EXCLUSION OF PUBLIC AND PRESS

To consider the following motion:

That pursuant to Regulation 21 of the Local Authorities (Executive Arrangements) (Access to Information) Regulations 2000 and having regard to the public interest, members of the public and press be

excluded from the meeting for the consideration of item 9, 10 & 11 which involve the likely disclosure of exempt information under the following category of Schedule 12A of the Local Government Act 1972:

(3) Information relating to the financial or business affairs of any particular person.

- | | | |
|-----|---|---------|
| 9. | FINANCIAL MANAGEMENT REPORT | 21 - 52 |
| | To brief the re3 Joint Waste Disposal Board on the Partnership's current financial position. | |
| 10. | HWRC REPORT | 53 - 72 |
| | To update the Board on the outcomes of the HWRC Project. | |
| 11. | STRATEGIC WASTE MANAGEMENT REPORT | 73 - 86 |
| | To review the outlook and options for strategic waste management within the re3 partnership. | |
| 12. | DATE OF THE NEXT BOARD MEETING | |
| | The next Joint Waste Disposal Board is on the 25 April 2019 at Longshot Lane Recycling Centre, Bracknell. | |

This page is intentionally left blank

JOINT WASTE DISPOSAL BOARD
12 OCTOBER 2018
(9.29 - 11.43 am)

Present: Bracknell Forest Borough Council
Councillor Mrs Dorothy Hayes MBE

Reading Borough Council
Councillor Tony Page

Wokingham District Council
Councillor Norman Jorgensen
Councillor Simon Weeks

Officers: Peter Baveystock, Wokingham Borough Council
Grace Bradbrook, Re3 Principal Finance Officer
Monika Bulmer, re3 Marketing and Communications Officer
Oliver Burt, re3 Strategic Waste Manager
Damian James, Bracknell Forest Council
Dave Moore, Reading Borough Council

Apologies for absence were received from:

Councillor Iain McCracken, Bracknell Forest Council
Councillor Sophia James, Reading Borough Council

11. Declarations of Interest

There were no declarations of interest.

12. Minutes of the Meeting of the Joint Waste Disposal Board

RESOLVED that the minutes of the meeting of the Joint Waste Disposal Board held on the 6 July 2018 be approved as a correct record and signed by the Chairman.

Arising on the minutes it was noted:

Minute 38 – The Waste Strategy had been signed off and adopted by all three of the Local Authorities following endorsement from the Board. The re3 Strategic Waste Manager was happy for the Strategy to be published on to the re3 website so that the Council's would be able to refer easily to the document.

Minute 6 – A report on the School Campaign would be brought back to the Board at a future meeting.

13. Urgent Items of Business

There were no urgent items of business.

14. Progress Report

The Board received a report briefing them on the progress in the delivery of the re3 Joint Waste PFI Contract. The report covered:

- Re3 Partnership

- Re3 Strategy
- Wood
- Paint
- Re3Grow Composts
- Plastic
- HWRC User Satisfaction
- HWRC Project
- Commercial Vehicle Permits
- Resources and Waste Strategy
- Communications update

The Board was advised that:

Re3 Partnership and Strategy

- Over the last 15 months the partnership had made good progress, including the implementation of the re3 strategy, kerbside wood recycling from October 2018, the introduction of pots, tubs and trays, the lotta bottle campaign and the introduction of food waste collection in Wokingham from April 2019.
- Objective 3 of the re3 strategy was to progress towards 50% household waste collection. A performance table had been produced for each council which set out the indicators and targets and measured progress.
- The recycling performance targets had been set by the individual Councils and will be reported throughout the period of the strategy.
- Work would be undertaken on material specific data throughout the year and the indicators would help to shape future decision and give an insight on areas that required improvement.
- Bracknell were meeting their kerbside target and Q1 2018/19 was an improvement on same quarter last year. Reading had not met the statutory target but recycling performance was better this year than last year, there had however been a slight reduction in kerbside recycling contamination. Wokingham – had increased the overall recycling rate but there were still some contamination issues to address.
- The recycling rate is different in summer than winter, often as a result of changes in volume of green waste.
- Board Members stressed the promptness of data as timely information was critical.

Wood

- Work was progressing with FCC for options for wood recycling. The details were being finalised with the preferred taker which was subject to trials. This could increase the recycling rate by <3.5%.
- The contractor was looking for 3 year contact.
- The Board was reminded that the Environment Agency was looking at wood standards but this would probably not be for the next 9 months.

- The wood recycling would apply to DIY wood/Timber, not tree cuttings.
- The figures at Appendix 1 didn't stack up with figures at 5.6 in the report. It was explained that the difference was a result of the ongoing negotiations on final terms. The correct and final figure would be clarified.

Paint

- Alongside the potential changes to wood there was a need to change the way paint recycling was processed.
- A review was underway to see if it was possible to harden paint at the HMRCs as a number of other Local Authorities already undertake this process and it could help to deliver a significant saving on current cost of processing paint.
- FCC were trialling paint hardening at two centres to ascertain cost and how to undertake the process.
- A report would be brought back to the Board in January to detail both the paint sales and how the paint hardening trial had gone.
- Officers will explore whether paint could be sold from the re3 Recycling Centres, similar to sales of re3Grow compost.

Compost

- Sales of compost went well this year. All 2000 bags were sold within a month.
- The compost would start to be sold in February/March, for the whole length of spring and the price would remain the same as in 2018.

Plastic

- The data had been circulated to the Board prior to the meeting.
- Pots tubs and trays appeared to be below target levels but that was the result of the PET plastics being recycled via the same route as plastic bottles. This is a higher quality material stream and indicates the effectiveness of the re3 MRF.
- There had been a notable increase in plastic recycling due to the media coverage of the issue and commitments from some retailers to produce less plastic waste.
- The public were more aware of contamination issues.

HWRC User Satisfaction

- The overall picture was most positive.
- Performance on both sites received 98% and 99 % satisfaction, which suggested that residents feel that both sites offered a good service.

- The majority of users tended to use the sites once a month. Officers explained that this highlights the inter-relationship between waste collection and the Recycling Centres.

HWRC project

- Detailed analysis was being undertaken regarding how and when both sites would reach capacity.
- Traffic count data was also being reviewed.
- Neither site was currently at capacity however this was being kept under review and any change would be reported to the Board. Officers explained that the tonnage capacity of the facilities as waste tonnages had fallen from over 200,000 per annum at the commencement of the contract. Current annual waste is expected to be 182,000 tonnes. The site had the capacity to take 295,000 tonnes of waste per annum.
- Officers would prepare a briefing on the potential for a reuse shop at the re3 Recycling Centres.
- Members wanted to ensure that both sites had the ability to handle increased waste truck visits.

Commercial Vehicle Permits

- A postcode look-up feature was about to go live on the webform. This would allow residents to input their re3 area address accurately.
- Options were being investigated to follow up with frequent users that were potentially trade users posing as household waste visitors.
- Ingress of trade waste is a problem for many sites. Officers explained that application of the existing controls were considered to be appropriate at present.
- If further steps were needed, the example of other authorities and sites would be reviewed. Warwickshire CC had additional measures in place and officers will provide a briefing on them at a future meeting.
- It was noted that Vale of Glamorgan operated a system similar to that employed by re3 for the retrieval of recyclable or reusable items delivered in bags to the Recycling Centres. The principal difference was that Vale of Glamorgan residents are invited to remain whilst their waste is sorted and the items which should not be disposed are highlighted.

Resources and Waste Strategy

- The EU Circular Economy Package (which introduced recycling rates of 55% by 2025) had been adopted and was therefore expected to be retained by the UK even after Brexit.
- As part of the same package, producer responsibility principles were being extended. It was felt that moving towards full cost recovery would present alternative ways of funding waste management.

- The chancellor had previously said that there would be taxation introduced on plastic waste. This will take the form of a potential tax on plastic items with a recycled content below 30%.
- It had been reported that food waste collection may become compulsory for Local Authorities in the long term.
- The Governments Waste and Resources Strategy was expected to be published before the end of 2018.

Communications

- Raising recycling awareness, in particular plastics as this was a high engaging topic at present and there was a good story to share as re3 plastic was recycled in the UK.
- Recycle week had just happened and had helped to engage residents across different levels. National and local press and media had been taken to the MRF, had received presentations and conducted interviews. Coverage in the media had been very good, and feedback was positive, with the press pleased to be invited.
- re3 also recruited three residents who shared their experience of plastic recycling, the programme received national coverage and was repeated on numerous occasions.
- Public tours were organised during Recycle Week, 24th – 30th September and facilitated by re3 Officers. There were five guided tours, allowing 75 people to attend (80% attended). Residents visiting the MRF facility were shown a presentation that helped them to understand the importance of recycling and the sorting process. All tours also included Q&A. Feedback following the tours was very positive.
- The tours had been eye opening, with the public enjoying seeing the process. Future tours will be arranged.
- A social media campaign using localised images had worked well. More were being prepared.
- There had been a 260% increase in social media followers since 2018. Councils were also now sharing re3 content, and re3 is producing specific content for each council for sharing on their individual pages also.
- Advertising was going to be introduced on digital screens and reading buses, similar to the adverts in the council magazines.
- The Re3cyclopedia app had been launched. Key features included searching for waste items and finding recycling sites. So far there had been over 600 downloads of the App.
- On the 10 September the new glass collection vehicles were presented as part of the glass campaign. These had been named Kate Binslet and Jar Jar Clinks.

- The food waste adverts had been included in the Primary Times magazine, this had been sent to all primary children.
- Email banners were being used to promote recycling. It is hoped that the respective waste collection teams and even re3 Councillors could use the themed signatures, for a period of time, in future.
- A new re3 logo was being developed by officers which highlighted the partnership of the three councils - “working together with you” was the new possible strapline on the logo.
- Foil advertising was underway which was in cooperation with Alupro. A campaign relating to fast food takeaways would commence in December.
- Central Berkshire Recycling had been picked as a case study on the G20 Global infrastructure Hub website. The link to the website would be sent to Board Members.
- The re3 Marketing and Communications Officer has attended meetings with Wokingham Borough Council team and WRAP to provide communications support that would help introduce a food waste collection in Wokingham Borough. It was requested that this communication be shared with the Board.

RESOLVED that

- i. Members note the contents of the report.
- ii. Members support the planned paint hardening trial and seek a further report to the JWDB in January 2018 as described at 5.14 of the re3 Strategic Waste Manager’s report.
- iii. Members agree for the second batch of 6,000 bags of re3Grow compost to be produced using the same method as utilised for the first.
- iv. Members receive a further report on research into the requirements and potential benefits of a reuse shop as described at 6.18 of the re3 Strategic Waste Manager’s report.
- v. Members agree the proposed times of closure for the Household Waste Recycling Centres over Christmas and New Year 2018/19 as described at 6.30 of the re3 Strategic Waste Manager’s report.

15. Exclusion of Public and Press

That pursuant to Regulation 21 of the Local Authorities (Executive Arrangements) (Access to Information) Regulations 2000 and having regard to the public interest, members of the public and press be excluded from the meeting for the consideration of item 16 which involves the likely disclosure of exempt information under the following category of Schedule 12A of the Local Government Act 1972:

- (3) Information relating to the financial or business affairs of any particular person.

16. Finance Report

The Board received a report briefing them on the Partnership’s current financial

position.

It was requested that an additional Board meeting be held in November/December.

RESOLVED that:

- i. Members note the contents of this report.
- ii. Members indicate that they would like officers to prepare a detailed report on the potential to deliver savings via the closure of re3 HWRCs for periods in the week, as described at 6.20 in the re3 Strategic Waste Manager's report.
- iii. Members indicate their willingness to withdraw support for the continued commissioning, by the Contractor, of Aon as Broker to the re3 PFI Contract.
- iv. Members endorse the recommendation at 7.7 of the re3 Strategic Waste Manager's report and approve bid A for the processing of food waste within the re3 Shared Waste PFI Contract.

17. **Date of the Next Board Meeting**

The date of the next Joint Waste Disposal Board was Thursday 24 January at Wokingham Borough Council.

18. **A.O.B**

It was requested that there be substitute members of the Joint Waste Board. The Board Manager requested that Officers took this back to their individual councils for discussion on how this should be arranged.

CHAIRMAN

This page is intentionally left blank

TO: JOINT WASTE DISPOSAL BOARD
24th January 2019

PROGRESS REPORT
Report of the re3 Strategic Waste Manager

1 INTRODUCTION

- 1.1 The purpose of this report is to brief the re3 Joint Waste Disposal Board on progress in the delivery of the re3 Joint Waste PFI Contract.

2 RECOMMENDATION

- 2.1 **That Members note the contents of this report.**

3 ALTERNATIVE OPTIONS CONSIDERED

- 3.1 The changes in service contained within this report describe, and represent, alternative options to existing systems.

4 REASONS FOR RECOMMENDATION

- 4.1 The purpose of this report is to brief Members in relation to progress in delivery of the re3 Joint Waste PFI Contract.

5 PROGRESS IN RELATION TO WASTE MANAGEMENT

re3 Waste Strategy Targets

- 5.1 The re3 Strategy 2018-20 sets out a series of objectives designed to support the priority themes of reducing the net cost of waste and recycling 50% of household waste. Objective C presents a series of indicators and targets to promote and record progress towards the latter.
- 5.2 There are two principal targets included within Objective C. The first measures the overall rate of reuse and recycling whilst the second measures the contribution of the relevant kerbside recycling collection (mixed dry recycling). The Objective also includes a series of indicators which are intended to inform decision-making and detailed analysis of the efficiency of the waste collection service. Among these is information on the recycling of incinerator bottom ash which, whilst excluded from the overall measure of reuse and recycling, is of relevance in terms of general performance.
- 5.3 At the Joint Waste Disposal Board in October 2018, Officers presented a table for each of the re3 Councils setting out performance for Quarter One of 2018/19 (April – June).
- 5.4 Performance measurement arrangements, within the re3 contract, were configured to match the requirements of the statutory reporting platform, WasteDataFlow. Accordingly, data is not finalised three months after the end of a quarter.
- 5.5 However, Members requested that provisional information be reviewed at each subsequent Board Meeting to ensure that timely information is received. Accordingly, provisional data for Quarter Three (October – December 2018) is presented in Appendix One.

- 5.6 At the time of writing this report, some of the quarterly data required from third parties is still awaited. This includes data on the treatment of street sweepings, clinical waste tonnages and information on the material received at charity bring banks across the re3 area. As a result a number of estimates have been included for the purposes of the analysis. These estimates will be replaced with 'actual' data as soon as they are received. However, due to the relatively small tonnages involved, it is expected that the final results for Quarter Three should show little variance from those presented in Appendix One.
- 5.7 Appendix One indicates that the overall recycling rate of each of the three Councils is lower in the first nine months of 2018/19, than it was at the same time last year. Whilst wood recycling at the HWRC and food recycling in Wokingham will both have a positive impact, the data suggests that further improvements will be required in 2019/20 if all three Councils are to meet the targets that have been set.
- 5.8 Alongside performance against Objective C, Officers have also presented performance in relation to Objective D. This Objective recognises the contribution of the Household Waste Recycling Centres in achieving the goals of the strategy.
- 5.9 Appendix Two shows that the recycling rates of the two HWRCs are similar for the first nine months of 2018/19. Smallmead is currently performing above target, whilst Longshot Lane is marginally below the level of its target. However due to the impact of wood recycling from January 2019, performance at both sites should improve in the remainder of the current year.

6 COMMUNICATIONS

- 6.1 The re3 Strategy objective to achieve 50% recycling and reuse rate, through raising awareness of recycling with a focus on improving recycling was reflected in a range of advertising campaigns directed at the re3 residents in the period since the last re3 Board meeting in October 2018.
- 6.2 re3 adverts and articles were published in the Council magazines issued by Bracknell Forest and Wokingham Borough in December 2018. The magazines are distributed and delivered free of charge to each household in the Boroughs.
- 6.3 The re3 Marketing and Communications Officer also established an advertising campaign on digital screens installed inside Reading buses; adverts with a focus on plastic recycling and promoting the re3cyclopedia app were displayed on 200+ screens across fleet of 100+ buses for two weeks in October.
- 6.4 re3 launched a new App called re3cyclopedia in September. Since the launch re3cyclopedia was downloaded by 3,100 residents and over 4,000 waste items searches were made in December alone. The search is now being added to the new re3 website as well as to the Reading and Wokingham council's websites. In the second half of December, the app was downloaded by 1400 residents (this peak coincides with issuing Councils magazines and adverts displayed on large screen outside the Reading station).
- 6.5 In addition, adverts were placed on the digital screens located within Reading Borough Councils' premises and the newly installed large digital screen outside Reading Station.
- 6.6 The re3 'Lotta Bottle' Campaign came to an end in October 2018. In total 49 registered groups took part, out of which 32 are children's groups such as schools

and 17 have a community interest focus. Bottle bank data shows 4.35% of glass tonnage collected from glass banks around the re3 area over the period of 12 months 2017/2018 vs 2016/2017, an equivalent to 290 tonnes. This is an increase in comparison to 2016/2017 vs 2015/2016 which was: 0.53%. The increased tonnage provided re3 partnership with financial benefits of £20,975 (estimated savings on disposal cost and income generated from the sales of this material). The campaign offered re3 an increased brand visibility on social media and raised the profile of re3 as a waste management service and brand through working with community groups.

- 6.7 As part of the promotion, including funding from our Contractor FCC, 15 winners were selected from the groups who registered for 'Lottabottle'. They will now be featured in communications alongside representatives of the re3 Board and the Contractor.
- 6.8 re3 ran a festive communications campaign that focused on recycling during and after Christmas. Activities included tailored re3 Advent Calendar, press release and variety of seasonal messages including those provided by supporting organisations ie. WRAP and Alupro. Christmas-themed adverts were used on the digital screen outside Reading station, within premises of Reading Borough Council and in social media advertising across the re3 area.
- 6.9 In January, re3 gained significant, and positive, media exposure in regards to management of post-Christmas waste. The topics of recycling glass after Christmas and Christmas tree recycling were covered by a wide range of media outlets including TV channels: BBC South, ITV Meridian, That's TV Thames Valley as well as online articles in Daily Mail, Mirror, Yahoo, Sky, Bracknell News.
- 6.10 re3 is delivering a new style of promotional campaign focusing on foil recycling. The recycling message has been added onto takeaway lids that are used to cover meals served in foil trays. Over the course of the campaign 50,000 promotional lids will be distributed to residents across three boroughs through 12 takeaway outlets. In addition, re3 has been running a social media promotion to encourage foil recycling, involving asking resident to post photo of them recycling foil trays. The campaign started in mid-December and is planned to be completed by mid-February. The campaign has been delivered in cooperation with the aluminium recycling organisation, Alupro, who provided 80% funding for the campaign.
- 6.11 re3 has provided design support to Wokingham Borough Council in preparing promotional materials to help effectively introduce the forthcoming food waste collection in Wokingham Borough. This includes assets such as vehicle livery, posters, leaflets and pull up banners.
- 6.12 The re3 Marketing and Communications Officer and Contractor are working together to deliver changes to the re3 website. A new, refreshed, website should be completed by the end of March of 2019.
- 6.13 In the upcoming months, re3 will be working towards establishing the foundations for more structured cooperation with local environmental groups and individuals that are well recognised within the community. Whilst the format is yet to be finalised, this project could include setting up regular meetings for the exchange of information which is relevant to the community and offering volunteering opportunities to residents. The scope of the project will be established via consultation, which will include with Councillors and Officers, in due course.
- 6.14 The re3 Strategy objective to achieve 50% recycling and reuse rate, through promoting the re3 Material Recycling Facility is reflected in the production of a new

video.. The video will be used during educational visits to the MRF and will be part of the joint education resources available to schools. The video, which will promote what the re3 partnership does with recycling and the continuing importance of re3 residents participating, will also be used on the re3 website, with excerpts used in social media posts.

- 6.15 re3grow will be available on sale at the recycling centres as of early March 2019. The sale of compost will be advertised at the site, website and on social media. This year, the compost will be over 90% re3 material, allowing us to strengthen positive messaging about the circularity of this product. re3Grow will be available at the same price as in 2018 (£3.50 per 40litre bag or three bags for £10).

7 ADVICE RECEIVED FROM ADMINISTERING AUTHORITY

Category	Background	Cumulative Performance													
		Target/Indicator	Quarter 3												
C3A Statutory Recycling Target	This target is the traditional 'recycling rate' target that should be comparable with other councils in the UK.	Target: 52%	40.46%												
C3B Kerbside Recycling	Using the respective weekly council kerbside collections is an effective way to recycle. This indicator looks at this service alone.	Target: 26%	22.80%												
C3C Including Incinerator Bottom Ash (IBA)	<i>Despite displacing 'virgin' materials, the recycling of IBA into building blocks is not yet counted as 'recycling' by the Government. Nonetheless, re3 recognises the value of this activity.</i>	9%	9%												
C3E Contamination	<i>Contamination is the term used to describe items which are not supposed to be present within recyclables. The level of contamination is, therefore, an indicator of the effectiveness of waste collection arrangements. It also has an impact on recycling because at high levels of contamination it can become harder to separate 'good' recyclables from the unwanted items.</i>	<table border="1"> <tr><td>Target Materials</td><td>77.53%</td></tr> <tr><td>Non-Target Paper and Card</td><td>11.79%</td></tr> <tr><td>Other Non-Target and Non-Recyclable Materials</td><td>10.68%</td></tr> </table>	Target Materials	77.53%	Non-Target Paper and Card	11.79%	Other Non-Target and Non-Recyclable Materials	10.68%	<table border="1"> <tr><td>Target Materials</td><td>83.78%</td></tr> <tr><td>Non-Target Paper and Card</td><td>8.08%</td></tr> <tr><td>Other Non-Target and Non-Recyclable Materials</td><td>8.14%</td></tr> </table>	Target Materials	83.78%	Non-Target Paper and Card	8.08%	Other Non-Target and Non-Recyclable Materials	8.14%
Target Materials	77.53%														
Non-Target Paper and Card	11.79%														
Other Non-Target and Non-Recyclable Materials	10.68%														
Target Materials	83.78%														
Non-Target Paper and Card	8.08%														
Other Non-Target and Non-Recyclable Materials	8.14%														

APPENDIX TWO – Objective D

Recycling Centres

Category	Cumulative Performance	
	Target (2018/19)	Quarter 3
D Longshot Lane	Target: 55%	53.01%
D Smallmead	Target: 50%	52.24%
