Adults Operational Services

Service Overview – Adult Social Care Operations

Whichever service people receive support from our primary objective is always early intervention, prevention and building resilience

Our Adult's Community team work with individuals who are in poor health or are suffering from a long-term condition to help them to identify their strengths and informal support networks and where they will need our help. Our aim is to help people to maximise their independence so that they can live in their own homes and make choices about how they live their lives.

The Community Team for People with Learning Disabilities work individuals and their families to assess needs and help them develop personalised support arrangements.

We also have a Community Team for People with a primary diagnosis of Autistic Spectrum Disorder and their carers.
