## Bracknell Forest Overview and Scrutiny Commission

3<sup>rd</sup> August 2021

---

Bracknell   North East Hampshire and Farnham   Royal Borough of Windsor and Maidenhead   Slough   Surrey Heath

1

### Key Issues for Health

- Circulating Covid infection rates particularly in younger people aged 20-29 – risk to those unvaccinated and vulnerable in our community.
- Continued pressures across the board on Urgent Care services – much higher levels than pre-Covid.
- Need to maintain infection control prevention control measures in healthcare which differ to the changes and messaging to the public from 19<sup>th</sup> July regarding other settings.
- Increasing rates of admissions into hospital of patients with Covid and respiratory infections in children - growing pressures on critical care, and paediatrics.

## Key Issues for Health

**NHS**  
Frimley  
Clinical Commissioning Group

- General Practices continue to experience very high and increasing levels of patients seeking to access care, especially urgent care on the same day. Demand is outstripping capacity. Practices continue to support delivery of Vaccines programme, focus on supporting those with long terms conditions and who are more vulnerable.
- Increased and sustained demand for mental health services including children with eating disorders or disordered eating and needing urgent mental health support.
- Direct and indirect impact on all our communities – long Covid, those waiting for treatment, safeguarding and wider determinants.
- Concerns remain over all our workforce and resilience, with low morale and workforce fatigue prevalent.

## Services capacity - headlines

**NHS**  
Frimley  
Clinical Commissioning Group

Service Area	Current position
Urgent & Emergency Care	The system has seen a steady increase in ED attendances since January 2021 and these remain extremely high and above pre-Covid levels. Emergency admissions remain high on both hospital sites within Frimley ICS. All Places including Bracknell Forest are showing activity levels at or slightly higher than pre-Covid activity for 'amber' level attendances. The Urgent Care Centre at Brants Bridge is well utilised. Public messaging has been focusing on helping local people know where to go to access the help they need.

## Services capacity - headlines

**NHS**  
Frimley  
Clinical Commissioning Group

Service Area	Current position
Elective Care	<p>Elective inpatients and outpatient services are focused on reducing waiting times. Waiting lists have grown during the pandemic and patients are being prioritised based on clinical need. Cancer referrals and waiting lists are better than national average in Frimley</p> <p>Increasing proportion of outpatient appointments are being offered by telephone or video, particularly for follow up attendances. Total GP referrals have now recovered to pre-pandemic levels and are stable.</p>

## Integrated Urgent Care Pathway – Brants Bridge

**NHS**  
Frimley  
Clinical Commissioning Group

**Total activity Pre-Covid at Brants Bridge (Bracknell Forest patients)**

- March 2019 to February 2020 = 19,965 cases
- 1,815 on average per month

**Current service capacity:** *Please note that Health Services continue to provided in the context of national infection prevention control guidance. This has a material impact on the number of available slots as clinical space requires cleaning after each patient and social distancing must be maintained.*

Bracknell Forest   North East Hampshire and Farnham   Royal Borough of Windsor and Maidenhead   Slough   Surrey Heath

## What Next?

- **Health promotion:** we need to continue to engage with our communities in enabling them to make good choices in how and when to access services, and in promoting self care and prevention.
- **Community engagement:** We will use insights and intelligence on the needs of our communities and their experiences of services to inform discussions on the impact of the changes we have made and any future local services.
- **Service review and development:** continuing to working with our partners and communities to deliver models of care which improve outcomes for local people.
