4. Strategic Narrative

Selected Health and Wellbeing Board:

Bracknell Forest

Please outline your approach towards integration of health & social care:

When providing your responses to the below sections, please highlight any learning from the previous planning round (2017-2019) and cover any priorities for reducing health inequalities under the Equality Act 2010.

Please note that there are 4 responses required below, for questions: A), B(i), B(ii) and C)

[Link to B\) \(i\)](#)

[Link to B\) \(ii\)](#)

[Link to C\)](#)

A) Person-centred outcomes

Your approach to integrating care around the person, this may include (but is not limited to):

- Prevention and self-care

- Promoting choice and independence

Remaining Word Limit:

898

Bracknell have embraced the concept of a strength based approach to prevention and self care in care planning, and there are several schemes that have been implemented to further embed this methodology.

The Intermediate Care and Adult Community teams have adopted the conversations techniques, wherein staff are encouraged to begin any assessment by determining what tasks an individual can achieve, (along with any support they currently have from family, neighbours etc.) rather than a negative viewpoint of 'what are you struggling with?'. This enables practitioners to draw upon alternative solutions to providing personalised support, as well as acknowledging the needs of carers, rather than immediately resorting to arranging a package of care.

The Bracknell Help Yourself online portal (launched in 2017) is a central resource enabling residents to search and find the support they need for themselves. This includes small home adaptations and equipment, leisure activities or clubs, as well as finding a personal assistant or home care agency. Bracknell Forest also now employs two full time staff as 'Community Connectors' whose role is to encourage and enable residents to get involved in local activities, clubs and groups to combat the social isolation that so many people experience. The Connectors will work with someone to identify an appropriate activity and attend the first session with the person if they do not feel confident enough to go alone.

Direct Payments are an option chosen by many residents to enable them to flexibly manage their own care requirements. This allows people to have more choice in selecting a care agency as well as being able to tailor call timings and length (within an allocated budget) to best suit them.

Having expanded in 2018, the Bracknell Intermediate Care team have now recruited to many of the newly created posts and are developing their Intake function as a Multi Disciplinary approach to triaging incoming referrals. The service operates using a shift rota, with staff available between 8am and 8pm Monday to Friday as well as therapy support over the weekend, to respond to emergencies in the community or to avoid admission to an acute hospital. This Multi-disciplinary approach is intended to allow decisions to be made earlier and the right professionals to be involved from the beginning of a person's journey through reablement, making the process smoother and more effective as a whole. This aligns with the ICDM approach of developing Locality Access Points; retaining a single point of contact for a range of professionals, co-ordinating care around the individual's needs rather than the service specifications.

Work with GP practices has continued in developing Anticipatory Care Planning pathways; with practices identifying patients at risk of developing health conditions or becoming frail and referring them to the ACP Cluster discussions. These meetings include a variety of professionals, including GPs, occupational therapists, physiotherapists, social care and mental health staff, with the intention that low level support or advice provided at an earlier stage will help the individual to manage their condition themselves as much as possible; delaying or reducing the need for long term support.

2017 also saw the introduction of an outcomes-based commissioning contract for domiciliary care for Bracknell Forest, with a limited framework of care providers with whom closer working relationships could be developed. The inclusion of wellbeing plans to be completed by care providers also indicates a move away from 'time and task' focused care on to a more personalised model, again taking into account the broader range of support available to an individual from their community.

B) HWB level

(i) Your approach to integrated services at HWB level (and neighbourhood where applicable), this may include (but is not limited to):

- Joint commissioning arrangements
- Alignment with primary care services (including PCNs (Primary Care Networks))
- Alignment of services and the approach to partnership with the VCS (Voluntary and Community Sector)

[^^ Link back to top](#)

Remaining Word Limit: 548

It is widely recognised that the most effective approach to improving health outcomes involves joint input across organisations (health, social care, mental health, GPs, voluntary services etc.). As such, the Integrated Care Decision Making programme has been designed to incorporate partners in order to best support people with complex needs and/or multiple health conditions. The Primary Care Networks link in with the ICDM Cluster meetings in identifying patients who have had multiple hospital admissions and/or are becoming increasingly frail, as well as patients who are at risk of developing these conditions (see Anticipatory Care Planning in section A). The Cluster meetings bring together a variety of professionals across various disciplines in order to create a holistic care plan for the patient.

A Risk Funding Protocol has also been developed in conjunction with East Berkshire CCG as an alternative funding pathway for people in hospital who are ready for discharge but their needs cannot be met by existing services. The protocol is funded from BCF budget and will agree funding for specialist services that meet the individual's needs for up to 14 days, to facilitate discharge from hospital and allow for further assessment in the person's home environment. This allows for the patient's needs to be appropriately met, without causing unnecessary delays for hospitals.

The Red Cross home from hospital service continues to provide valuable support (food shopping, rebuilding confidence, companionship and signposting) to vulnerable people for up to 6 weeks following discharge from hospital.

(ii) Your approach to integration with wider services (e.g. Housing), this should include:
- Your approach to using the DFG to support the housing needs of people with disabilities or care needs. This should include any arrangements for strategic planning for the use of adaptations and technologies to support independent living in line with the

[^^ Link back to top](#)

Remaining Word Limit: 576

The Disabled Facilities Grant is used to provide adaptations to a disabled persons property in order to better accommodate them and any mobility equipment they may need. The adaptations must be assessed as being necessary and appropriate for the needs of the person as well as reasonable and practicable in relation to the property. The most common adaptations provided are level access showers, but the scheme also covers stairlifts, ramps, hoisting equipment, and the widening of doorways. The provision of these modifications enables people to remain as independent as possible, often allowing them to remain living in their own homes for longer.

Bracknell Forest also have dedicated Occupational Therapists who provide equipment for people with a sensory impairment (sight or hearing) including talking microwaves, daylight lamps, liquid level indicators, amplified doorbells and telephones, as well as vibrating alert systems that link in with smoke detectors etc.

As part of the Enhanced Intermediate Care service, Bracknell have appointed an Assistive Technology Advisor who works in conjunction with the ICS therapists and hospital team to identify people who would benefit from equipment such as pendant alarms, mobile GPS trackers, motion sensors, falls detectors, or medication prompting devices. This equipment enables people to feel safer, (especially those who live alone) knowing there is a contingency should an accident occur.

C) System level alignment, for example this may include (but is not limited to):

- How the BCF plan and other plans align to the wider integration landscape, such as STP/ICS plans
- A brief description of joint governance arrangements for the BCF plan
